A Cybersecurity Bachelor's student at EPITECH, I am looking for a 4 to 6 month internship from late March 2027, in penetration testing or application security. I have audited web and API applications in a banking group and spent six months on the security of a production SaaS platform.

EDUCATION

2025 - 2028	EPITECH Bachelor's in Cybersecurity Penetration testing, application security, threat modeling, incident response.	Paris, France
-------------	--	---------------

PROFESSIONAL EXPERIENCE

Apr 2026 - Present	PoC Innovation Association Head of Cybersecurity Events · R&D Developer - Design and delivery of nationwide cybersecurity events: hands-on attack and defense workshops, live demonstrations, and participant coaching. - Coordination of the academic and industry partners (MIT, UCL, CISPA, Kiln). - R&D: ChainBreak, the association's offensive training platform (28 challenges, isolated terminal sessions, server-side flag validation); I.R.I.S reverse image search, an embedded recognition and OSINT system (Python, Playwright, YOLO).	Paris
Jul 2026 - Aug 2026	Bank of Africa Banking & Finance Application Security Intern - Application security audits on internal and internet-facing applications: web and API penetration testing, vulnerability reproduction and remediation reporting, several critical findings raised. - Vendor-delivered EDR training: endpoint detection, alert triage and investigation.	France
Jan - Jun 2026	Startup SaaS B2B/B2G Lead Security Engineer - Owned the security posture of the production platform (Next.js, Fastify, PostgreSQL, Docker Compose): IAM governance, encryption at rest and in transit, vulnerability management and continuous remediation. - Infrastructure hardening: RBAC, CI/CD pipeline and reverse-proxy hardening, fail2ban, RAG pipeline security, and NPM dependency CVE fixes.	Paris, France
Jan - Apr 2026	Alignerr Technology AI Model Trainer / Evaluator Two evaluation engagements commissioned by Anthropic and Airbnb: agentic coding evaluation rounds on Claude Code, writing development tasks on open-source repositories (EigenLayer), A/B comparison and scoring of solutions.	Remote

LANGUAGES & TECHNICAL SKILLS

French: Native | **English:** Fluent
Offensive: web/API penetration testing (OWASP Top 10), vulnerability management, social engineering | **Defensive:** system hardening, IAM, EDR, CI/CD security
Languages: Python, Bash, TypeScript, C | **Tools:** Burp Suite, OpenVAS/GVM, GoPhish, Docker, GitHub Actions, Linux/BlackArch | **Agentic coding:** Claude Code

PROJECTS & INTERESTS

Keter — 1st prize, Hackathon Dauphine × Delubac
MiCA / GDPR compliance platform for ERC-1400 security tokens: Noir / UltraPlonk circuits, on-chain verification (Sepolia), client-side proof generation (NoirJS).
REDTEXT — open-source Red Team tool (Python)
Generates social engineering scenarios (phishing, vishing, smishing, quishing) for authorized engagements, deployed via the GoPhish API. github.com/keuchnotkush/REDTEXT
Other open-source projects — gvm-blackarch: reproducible Greenbone / OpenVAS install for Arch and BlackArch (Docker, shell). **OWASP Juice Shop:** 18 web exploitation writeups (EPITECH CTF). **SAMPO:** full-stack job aggregator (React, Node, FastAPI, PostgreSQL, Docker).
Passionate about neo-expressionist art (Jean-Michel Basquiat; Georg Baselitz)
